Remembrance Day

November 11th.

In Memory

In France the swaying poplars shed
Their flame-like petals where the dead
Are sleeping quietly. Like drops of blood
They mark the spot where young manhood
Yielded to life that TRUTH might know
It's fullest liberty—Poplars glow,
But when distilled, give plain success—
And souls of dead tale whisper "PEACE."
Edith Tatum—Good Housekeeping.

GRAND DANCE

"Remembrance Day," will be duly celebrated by the Crossfield Branch of the Canadian Legion B.E.S.L.

On Friday evening, November 9th, the annual dance will be held in the U.F.A. hall with the Melody Boys supplying the music. This dance is looked forward to as one of the events of the season.

MEMORIAL SERVICE

On Sunday a Memorial Service will be held in the United Church at 3:00 o'clock. This service will without a doubt be well attended and most inspiring.

FAITHFUL DOG FOILS ENRAGED BULL

A faithful dog possibly saved the life of Mrs. Unrau, residing east of town, on Wednesday afternoon, when she was attacked and knocked down by an enraged bull. The dog drove the bull off and Mrs. Unrau escaped with bruises and a bad shake up.

Discuss Purchase of Rural Telephone Lines

Next Meeting in Sunshine School Saturday, November 17th.

A well attended meeting was held on November 2nd in the Sunshine School with a view to organizing a Rural Mutual Telephone Company.

Jas. Aldred, sr. was elected chairman of the meeting, and A. Higgins, district commercial supt of Alberta Government Telephones, outlined fully the proposed changes necessary.

It was suggested to form a Mutual Telephone Company to take over and operate the existing rural lines, and to raise the necessary amount of capital each subscriber would take out one \$20 share.

The following gentlemen were elected to form a canvassing committee, and those desirous of any information should immediately get in touch with any of the following: F. Laut, (chairman); H. May, (Sec); F. Rudy, Geo. Jones, A. Melling, J. Motheral, G. Ainscough, W. Gummill, G. Leach, J. H. Havens, R. Arnott, R. J. Laut or Frank Colliant.

The anticipated cost of operation of a telephone in the new company will be approximately a little more than half of the existing charges and this should be an inducement for old phones to be re-connected, and new ones put in.

While nothing definite was said, it would appear that the Government does not intend to expend much money on rural lines, and it is probable that when existing lines wear out, or if there are not sufficient subscribers on any certain line, that these lines will be scrapped.

A telephone is a necessity in time of trouble, a silent partner in business, and a convenience for the womenfolk. Now is the time for all who desire telephone communication to get behind this project, and be on hand at the next meeting, which will be held in Sunshine School on Saturday, November 17th at 2:00 p.m. Everybody welcome.

Mr. and Mrs. Chas. Fox were the guests of Rev. and Mrs. H. Young at Trochu on Sunday.

Mr. and Mrs. L. Overby were visitors to Calgary today. Louis had the cast removed from his injured leg.

Oriental vs. Occidental

Knife Play: Brings Severe Wounds

Mah Fong, Chinese cook employed at the Huser Farms inflicted bodily harm on a fellow labourer (Wm. Grey) Sunday, when knife play cut Grey's left hand severely.

It would appear that the two men got in to an argument and words ensued. Fong grabbing a butcher knife, made a threatening pass at Grey, who in attempting to grab his assailant's wrist, missed his aim, and received severe cuts on the palm of his left hand.

Dr. Whillans attended to Grey's injuries, and on Grey lodging a complaint next day Fong could not be located, having taken unto himself wings and flown from the district.

Speakman-McCool Meeting

The first formal visit to Crossfield of Alfred Speakman, M.P. for Red Deer in the Federal House left a very favourable impression in the minds of some 70 odd citizens who attended the joint meeting in the U.F.A. hall on Monday the 5th instant. The meeting was opened by the chairman, Mr. Aldred and addressed first by R. M. McCool, M.L.A. for Cochrane in the Provincial House.

Mr. McCool dealt in an able manner with several pieces of legislation passed at the last session of the House in Edmonton. His closing remarks were in connection with the reason behind the Government's decision to dispose of the rural telephone lines to the farmers themselves.

Mr. Speakman was billed to speak on the Federal Debt Legislation and the Marketing Act. Curiously enough he spent more time discussing the Banking legislation having to do with the decennial revision of the Bank Act and the incorporation of the Bank of Canada, than with either of the first mentioned topics. Obviously enough the Farmers' Creditors Arrangement Act was not designed to affect many farmers on the Calgary-Edmonton line and the speaker's remarks were of a general nature. The Act was intended to do something for men who have not had crops for 4 or 5 years. The Bank Act revision will carry that Act for another ten years.

The Marketing Act was also dealt with in a general way by Mr. Speakman who intimated that he was closely connected with those who prepared this particular Act and lent his assistance when called upon although it was a Government measure. He was very much in favor of the Act. He pointed out however that it was necessary for different groups to take the initiative if they wanted to come under the scheme and to this end a general meeting is being held in Calgary today (Thursday) to pass on a plan being submitted by specially selected men interested in livestock in the Province.

LOSES SISTER

Mrs. Russell Nichol received word of the death of her sister, Mrs. W. J. Caudwell who passed away in an Edmonton hospital after a long illness on Saturday, Nov. 3rd, at the age of 50 years. Mrs. Nichol left on Monday night to attend the funeral.

-Kerr - Cavendar

A marriage was solemnized between Miss Peggy Cavender, daughter of Mr. and Mrs. J. Cavender and Mr. William Kerr, son of Mr. and Mrs. Kerr of Edmonton, at the Knox Church, Calgary, Saturday evening last.

The bride walked up the aisle on the arm of her father to the strains of the Lohengrin wedding march, preceded by Miss Violet Armstrong of Calgary, who acted as bridesmaid.

The bridegroom was supported by M. C. Grant of Crossfield.

After the signing of the register the bridal party left the church to the accompaniment of Macleod's wedding march, and proceeded to the home of the bride's parents where a reception was held.

"Fresh from the Gardens"

A Call To Citizenship and Humanity

With the approach of winter in this country, located in the northern latitudes where winter weather is rigorous and prolonged, numerous organizations supported by thousands of warm-hearted and generous men and women are actively interesting themselves in the welfare of other thousands of their fellow citizens who are in difficulty and distress, lacking adequate shelter, clothing, fuel and food. These various organizations, each in its own right, are making appeal to the whole citizenship of Canada, to come to the aid of all those who are in need of assistance, through press, pulpit, the public platform and the radio are all enlisted in promoting this humanitarian work, and all of these agencies are gladly extending their services.

It is the interest, the sympathy, the generosity, the sacrifice of the individual citizens that is now required. Whatever opinions may have been held by many people in years gone by as to whether or not they were their brother's keeper, surely there can now be no two opinions as to the responsibility of each citizen for the welfare of other citizens. Duty to oneself and one's own family remains, as it always must remain, but the formerly entertained conception of that duty has narrowed during recent years, while one's duty to others has greatly widened. Past selfishness is the cause of much of the suffering and loss of to-day; more unselfishness and the larger patriotism is the universal call of duty to-day.

Because of continued unemployment everywhere, and the plight of so many people in Western Canada, especially in south-western Saskatchewan and in portions of Manitoba and Alberta because of another extensive crop failure due to drought, the need for extending assistance to thousands of families is as great as in any preceding year, and in some respects even greater.

Governments, acting on behalf of all the people, are shouldering the major problem. They are mortgaging the future in order that people may survive in the present. It is only thing to do; it must be done, and it being done. To Governments must be left the responsibility and duty which is theirs, but, as Premier Bennett stated in a recent address in support of the various charity drives, they cannot do it alone. They need the help of the citizen, no matter how extensive, can never take the place of the human touch provided by private social welfare agencies. As a result, the responsibility on those in the position to assist to the assistance of the needy is greater than ever in these times.

It is gratifying to note that appeals being made are not falling upon deaf ears or stony hearts. At the time of writing this article no less than 227 railway cars of produce, fruit and vegetables, have been voluntarily contributed by people in the eight other provinces to the drought-stricken areas of Saskatchewan, and additional cars are being provided every day. Churches, service clubs, the Red Cross, Community Chest organizations, and groups of public spirited men and women in cities, towns and villages all over the Dominion are at work, and the rural districts unaffected by drought are nobly responding.

But, as always, there are many who remain wrapped up in their selfishness, but who at a minimum of personal sacrifice could and should make substantial contribution to the needs of others. Too many people who are still in fairly comfortable circumstances consider themselves hard-up, and say they cannot make contributions, they ought to make, but they cannot, because their incomes to-day are reduced from what they were a few years ago. In those better times they were not called upon to give in proportion to what they had because the need was not so great; but to-day that need does exist, and it is their duty to respond to present appeals in still larger measure than formerly out of the incomes and reserves they still possess.

Our whole citizenship has a duty to perform because of our relationships to our fellow men. If that duty is not fully and even gladly met, then our most valued civilization is a sham and should and will crumble in ruins. Therefore, in every community no matter how small where an appeal on behalf of the needy is made, and regardless of the organization that may make the appeal, or the particular need which it is designed to meet, there should be a cordial welcome extended to those who are giving of their time and energy in promoting the success of the appeal, and the most generous response possible consistent with one's own actual needs as these may be seen and understood in the light of the actually desperate needs of others.

Praise Canadian Actress

Norma Shearer Is Complimented For Her English Diction

London drama critics are complimenting Norma Shearer, Montreal screen star, for her English diction. When it became known a United States motion picture company was filming "The Barretts of Wimpole Street," some fans wrote the newspapers suggesting the king's English probably would be mangled by the American actress chosen to play the difficult role of Elizabeth Barrett.

Then the picture was released in London, with the Canadian actress portraying Miss Barrett. The critic for The Daily Mail suggested in his column that Miss Shearer's accent should be studied by some of the British stars.

Learning To Fly Again

Colonel Bishop Is Making New Acquaintance With Controls

There is a pleasant tone of surprise in the report that Colonel W. A. Bishop, the Canadian airman who destroyed a large number of enemy aeroplanes during the war and was awarded the V.C., is now learning to fly at Montreal. Apparently the Colonel was one of those who returned from his victories more or less to his father farm. It is said that he has not taken a machine into the air since 1922, and he feels that somebody had better be looking over his shoulder while he comes to terms with the controls again. Well, it is a wise bird that knows when to return to the nest—Glasgow Herald.

Shooting The Fog

Secret Chemical Makes Air Clear In Few Seconds

Lightning raids on fog are foreshadowed by a secret chemical to which a trial was given recently. When a typical pea-soup specimen loomed up, engineers, having mounted their "guns," an array of centrifugal pipes suspended thirty feet horizontally above the ground fired streams of this liquid into the mist. In a few seconds a clear path was blown in the gloom, and while the chemical attack lasted, every fog particle, as it came within range of 2,000 feet, was brought to earth in the form of water. It is anticipated that aerodromes will be among the first to install this new fog-clearing equipment. Already thousands of pounds are expended annually on special fog signals and guidance signs.

If you suffer take advantage of this offer to try KRUSCHEN at NO EXPENSE

Suffer from rheumatism, sciatica, lumbago, overwork—try Kruschen Salts at once. Kruschen has brought relief to millions of people scattered over more than one hundred countries throughout the world. Kruschen rid the body of all food refuse, of all poisons and harmful acids which the root of your troubles or which may cause you bring these afflictions upon you. Ask your druggist today for the Kruschen Giant Package. This consists of one Regular 75c package and a FREE TRIAL BOTTLE. Use the trial bottle first. Use it as prescribed and Kruschen's six natural mineral salts will start you on a new life. With your mineral organs functioning as nature intended they should yield new health and new energy. Try Kruschen today AT NO EXPENSE. But remember, your druggist has only a limited supply.

Motoring On Sunlight

Dutch Inventors Claim Harnessed Rays Supply Sufficient Energy

Motoring on sunlight instead of petrol is the latest scientific dream, based on a discovery by two Dutch inventors. These men claim to have harnessed the sun's rays and multiplied their power a thousand times in a photo-electric cell, thereby making a high-powered car or aeroplane engine. Already the sun has been made to work for man in Egypt, where by concentrating its rays on solar boilers enough natural steam is generated to drive low-pressure turbines. This new system will, if practicable bring about an industrial revolution.

Seem To Have No Limit

Japs Hold First Place For Inventive Genius And Imagination

Our good friends the Japanese appear to have no limits so far as inventive genius is concerned. They have apparently discovered the secret of applying it to the imitation of anything that can possibly be manufactured in their own land. They have given the world bamboo fountain pens for a few cents; they have produced silk socks for a few cents; they have exported millions of parasols for a few cents. Now they are shipping tens of thousands of spare automobile parts for a few cents apiece—Montreal Star.

Have You Pimples or Boils?

Mr. T. A. Berry of 145 Wilmot St., W. had a bad case of boils and pimples. I believe, to the condition of my blood. I certainly was in misery as the boils were all over my face. I have now cleared my face and the boils gradually disappeared. I have now cleared my face and the boils gradually disappeared. I have now cleared my face and the boils gradually disappeared.

Criticism Often Unjust

The Ottawa Journal says most of us are quick to criticize the police. And our criticism is often unjust. For the miracle of police work, as it is organized to-day, is not that so many criminals escape, but that so many are apprehended. The public takes note of the few failures; it forgets the thousands of cases where the police succeed.

A noted French perfumer died recently, and among his effects was found a document in the form of a will leaving recipes, formulae, ideas and suggestions for perfumes, lotions, creams, to keep the laboratory staff busy for years.

Many parts of England are using coal gas as motor fuel with success and economy.

W. N. U. 2071

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT (Grapho-Analyst) (All Rights Reserved)

(Editor's Note: Hundreds of readers have written in, asking the author for a personal character analysis. Have you? The well-known Grapho-Analyst is writing this series of fascinating articles will be glad to tell you what your writing reveals. Write the special offer at the end of the article.)

This week, there are several letters that have a general appeal to a good many of my readers, dealing, as they do, with situations that may well arise for anyone.

Miss C., of Winnipeg, says: I am a stenographer, but simply detest the life. I am unhappy and feel that I am wasting my time. I have dabbled a bit with painting and drawing, and have been able to make a little extra money now and again in this way. What do you advise?

There are very definite indications in your writing that you have a rare talent for artistic work. Some of my correspondents also should they take up art as a career, and I am forced to advise them against it. But in your case, I can very earnestly suggest that you take up drawing as a career. This does not mean, of course, that you are to give up your present occupation at once.

You must take up your art work, seriously, but in your spare time. Work hard at it; take a good course, because it will pay you in the long run, and when you are in a position to make a career of it, then you can give up your stenographic work.

A writer in the New York country writes: I am 38 years of age, and have two children. I have been keeping company with a gentleman for some time, and he wants me to marry him. He says that he divorced his first wife as she was unfaithful, and did not look after him, preferring to gad about. I have a bit of money, but I am not sure whether I should marry my friend, or whether I should continue looking after my children.

I am sorry that I cannot recommend you to marry your friend. His writing is that of a deceitful and rather dishonest person. My correspondent would be far better off to remain as she is, than to marry him, as she would be in for some unhappy times.

She is not old yet, and will very likely have other opportunities of meeting someone who would make her a good husband, and see that the first wife was unfaithful, looking after him. But, in any case, she is better off as she is now, than married to him. I am sure that you will find employment here. He said that he would either come back, or send for her. Do not wait in love with me! Should I wait for him?

This is a case where Grapho-Analyst is of great help. He has to have to call in the aid of psychology. Your friend is of a very affectionate and sympathetic nature. He is reliable enough, and undoubtedly meant what he said when he told you, he would come back. But he is still a long distance from you, and my advice to you is to cultivate other friends. Do not shun the company of other boys.

You will know before very long whether your boy friend is still faithful to you. But it may be that he will stop writing. He may meet someone else, and then he will like to have nothing to do with other boys. That is unnatural and will not help you very much. On the other hand, you may realize your nature, more particularly if your old friend forgets you.

Do you want your character revealed from your handwriting? And to know what your friends are really like? Send specimens of the writing you want analyzed, and enclose 10c coin for each. Send with 3c stamped addressed envelope, to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg, Man. Letters will be answered as soon as possible but please allow about two weeks for your reply.

Pays Tribute To Explorer

Sweden Opens Museum In Memory Of Professor Andree

Sweden remembered Prof. Salomon August Andree, famed Arctic explorer, again on the 89th anniversary of his birth.

A new Andree Museum, containing relics, photographs and numerous details of his ill-fated balloon expedition, was opened, as the drama of his ending of his body 38 years after he and two companions floated away to the North, was recalled.

Ashes of Andree and the two men who died with him, Nils Strömberg and Knut Franke, will be given formal burial sometime this winter in North Cemetery at Stockholm. They were cremated after their discovery in 1930.

Automobile tires nowadays commonly run from 15,000 to 20,000 miles, compared with 3,000 to 4,000 miles, which was the life of a tire before the war, says a British writer.

Brazil, with an area of 3,176,358 square miles, has a population of 39,900,000.

Even Rheumatic Pains Eased Fast Now!

BAD HEADACHES, NEURITIS PAINS OFTEN RELIEVED IN MINUTES THIS WAY

Remember the pictures below when you want fast relief from pain. Demand and get the method doctors prescribe—Aspirin.

Millions have found that Aspirin cases even a bad headache, neuritis or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an Aspirin tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain

practically as soon as you swallow it. Equally important, Aspirin is safe. For scientific tests show this: Aspirin does not harm the heart.

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get ASPIRIN. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet.

Get tin of 100 tablets or economical bottle of 24 or 101 tablets.

Why Aspirin Works So Fast

IN 2 SECONDS BY STOP WATCH An Aspirin tablet starts to disintegrate and go to work.

What happens in these glass happens in your stomach—ASPIRIN starts taking hold of your pain a few minutes after taking.

When in Pain Remember These Pictures ASPIRIN IS THE TRADE MARK OF THE BAYER COMPANY, LIMITED

A Disagreeable Forecast

U.S. Expert Not Optimistic About Weather Of Future

If you asked J. B. Kincer, United States weather bureau official, to guess what the weather will be for the next 25 years, he'd say: "Colder and wetter."

Kincer, chief of the climatology division, told the Cosmos Club at Washington, there is good reason to suspect the United States (perhaps the world) is on the threshold of a change of climate.

For the past quarter century, he found, the world has had increasing warmth and decreasing rainfall. Records of periods before that show cycles of rising and falling temperatures and rain—lasting about the same number of years, he said. He believes another turn of the weather time may be imminent.

World's Noisiest Bird

Cockatoos Can Draw Out Dozen Motor Cars Horns

The scream of the peacock can be heard a mile away, but the noisiest bird in the world is the cockatoo. A single bird can make a din which would drown a dozen motor car horns and dim the sound of a steam whistle. The bell-bird of Brazil is runner-up to the cockatoo. This white bird is about the size of a pigeon. It lifts its head in the air and makes a noise that sounds like the bang of a hammer on an anvil.

The month of October seems the end of harvest in the northern hemisphere (Northern Canada, Alaska, Northern Russia, Sweden, Finland, and Norway) and the beginning of harvest in the southern hemisphere. November is the harvest month of Peru and South Africa; December that of Burma and Argentina, the harvest of the latter being carried on throughout January, which is also the harvest month of Uruguay, Chile, and Australia.

Cottonwood, TEXAS, has a well in the middle of its main street.

FALSE TEETH

DR. WENST'S POWDER

Would you like false teeth to fit so firmly yet comfortably they feel natural—eat, shout, laugh—all day long you can forget about them. Simply sprinkle on Dr. Wenst's Powder—prescribed by the world's foremost dentist—the one powder that assures 100% secure comfort. SPECIAL FEATURE: comfort-cushion protects sensitive gums—always keeps mouth clean and healthy. Inexpensive—any druggist.

Commercial canning is one of the oldest of the larger organized industries in Canada. Napoleon is credited as the originator of using air-tight containers for army rations, but the development of the industry is international. In 1809, in France, Francois Appert found that food put in air-tight containers required to be sterilized; an Englishman invented the tin can, and North America practically made canning the great industry it is to-day.

A Serbian sculptor has perfected a fire and water-proof brick made chiefly from paper.

The Winter Protection of Cod Liver Oil

PLUS A GREATER RESERVE OF VITALITY

Greatest Hunt For Gold In The History Of Canada Has Been Carried On Over Wide Area

A reason that brought what is believed to have been the greatest hunt for gold in Canada's history is drawing to a close. No figures are available to show the exact number of prospectors and assistants who struggled through often inhospitable country, but a careful approximation indicates a total of about 18,000.

Increased prices for the yellow metal spurred prospectors' activity. An added factor was extensive use of aeroplanes, which provided access to new districts and revealed existence of still more. Aerial photography, it is said, has revolutionized the metal-mining industry.

Pictures taken from speeding aeroplanes tell experts much. The topographical survey of the Department of the Interior produced 40,000 aerial photographs during the summer. From these, most of them taken in Northern Manitoba, Athabasca, Great Bear and Great Slave regions and in the Nahanni district near the Yukon boundary, maps are being developed. Planes of the Royal Canadian Air Force carrying aerial surveyors made flights over the famous Long Lac district in Northwestern Ontario. Some flights were made in other provinces. Much of the aerial photography this year was designed to help gold seekers.

Luck, prospectors and geologists say, is still the most important factor in the hunt for gold and less valuable metals. Once a tree was blown down, its roots were found, the surrounding soil and bared what developed to be one of the richest veins ever discovered in Canada. Last summer a prospector stopped on the shore of a lake because a high wind endangered his canoe. While he waited for the storm to abate he discovered what is regarded as one of the most important finds of the year. Such incidents are said to make prospectors superstitious.

Aerial photography has removed some of the chance from prospecting. It tells the field man what rocks contain gold and the territory where the soil, or what miners call "overburden," is too deep for them to find workable veins, even if they did exist. They help him concentrate his efforts where it is most likely to succeed.

Pictures show granite formations in which metals are seldom found, and, on the other hand, indicate geological "faults" and great fractures where profitable mineralization is more probable.

Stereoscopic placed over the pictures shows the valleys and hills in relief. After discovery of a vein a study of the pictures helps in development, as it shows the contour of the country and indicates the best route for a road and most advantageous location for a mill.

In the files of the topographical survey 600,000 negatives are kept, and a sufficient number of prints are available to prevent any possible shortage.

Got What She Wanted

Action Of New York Girl Would Seem Justifiable

Another story of an individual bucking the tides of big business is told us by a young lady who wanted six buttons. Simply six buttons of a certain size. She found the type she wanted at Altman's, but told the girl she needed a size larger than those on display. The girl asked her what color, and our young lady said the color didn't matter, because she was going to cover them with cloth. Altman's covered buttons, the girl said, and would be pleased to do the covering. The young lady said she'd like to cover her own buttons, please. In that case, the girl said, she couldn't sell the buttons. Altman's never sold buttons for covering. Then our young lady drew herself together and told a little white lie. She would take six red buttons, and wouldn't ever dream of re-covering them. The girl sold them.—The New Yorker.

More Radio Sets Sold

Not only were the radio sets sold in Canada during the first six months of 1934 more numerous than the sales during the same period of 1933, but they were also more expensive. The total value was \$2,165,000, compared with \$677,000 a year ago, the average value (factory prices) being \$34 and \$28 respectively. Over 8,000 of the sets sold were for automobiles.

Developed in England, a new type of autogyro having neither wings nor rudder can hang motionless in the air and land on a tennis court.

W. N. U. 2071

Dangerous Policy

Restoration Of The Dead Experiments Should Not Be Applied On Human Subjects

Raising of the dead is no great feat in the opinion of Professor Veinien E. Henderson, chief of the department of pharmacology at the University of Toronto, but is a dangerous practice when applied to human beings.

Dr. Henderson revealed university research workers frequently had restored to life animals apparently dead for as long as eight minutes, not as a trick to raise them from the dead but because success of experiments often depends on the subject remaining alive.

Animals such as dogs and cats, he said, had frequently been restored after overdoses of anaesthetics apparently killed them. The same method of restoration, he declared, had been applied to human beings killed by carbon monoxide gas poisoning, but the subjects frequently became idiots.

"We get these carbon monoxide cases," he said, "but the brain has been impaired and, in this respect, this tendency becomes more and more pronounced."

LAUNCHING OF THE "QUEEN MARY"

A splendid view of the launching of the Cunard White Star liner. Her Majesty, Queen Mary, very graciously performed the ceremony of naming the new vessel. On photograph shows the great size of the ship, which has an overall length of 1,018 feet. The height from the keel to the masthead is 234 feet.

Family Life In Russia

May Be Wrecked By Duty Of Citizens

To State

A wholesome family life holds any race together. Nations crumble when the sanctity of the home is disregarded or social laws are abrogated. It is not unlikely the Soviet union of Russia may smash on that phase alone for the Bolsheviks or new dealers there are playing with fire. In discussions in Russian newspapers the young communists are asking if it is possible to continue the family organization and at the same time discharge their regimental duties to the state. The burden of the correspondence is the complaint that the amount of work required of citizens by the community leaves neither men nor women sufficient time to develop a wholesome and affectionate family relationship. Some frankly ask why, if it interferes with the discharge of the duties imposed by the state, family life should not disappear, at any rate for the present. The appalling implications of this suggestion show how far the process of regimentation has diverted the mind of Soviet youth.—Brandon Sun.

"They're verra thorough in London," said Mac. "I lost a shillin' in the Strand and reported it to the police. Next mornin' I went to search again and they'd got the road up!"

Manitoba Pension Plan

No Change In System Contemplated By Government

To State

Changes in the Old Age Pensions Act in Ontario proposed by Hon. David Croft, minister of public welfare, appeared to be a move toward the system now in effect in Manitoba. C. K. Newcomb, administrator of Manitoba old age pensions, states. In Winnipeg applications for old age pensions were made to the social welfare commission. In all other Manitoba towns applications were made to municipal councils. Those whose applications were rejected may appeal to Mr. Newcomb for a hearing.

Mr. Newcomb said he had no reason to believe any changes in the system were being contemplated by the provincial government at present.

While Canada is finding new markets for dried milk products, Russia is making a bid to increase her exports in this line. A large factory with an annual capacity of 5,000 tons of dried milk has been set up at Yalutorovsk on the Trans-Siberian railway in a district in the Urals famous before the war for dairy cows and butter.

Undaunted by the lack of snow in Australia, youths of Sydney are skating on manholes.

The SNAPSHOT GUILD

Your Own "Candid Camera"

A "candid camera" snapshot, replete with the troublous atmosphere of an unhappy moment. It tells the whole story.

Some magazines and newspapers make a great to-do about "candid camera" pictures, so called because they portray the great and near-great in unguarded moments and poses.

Many "candid camera" shots have been made at banquets, receptions, conferences and other such affairs. They show notables being thoroughly human, unaware of the presence of a camera.

Naturally such pictures have a lot of appeal. For they show people as they really are—eating, talking, worrying.

These candid snapshots are usually made with very small cameras, equipped with exceptionally fast lenses and film. Such cameras do not need brilliant light, and they can be handled so casually that they do not become conspicuous.

But you don't need any such camera to make your own "candid camera" snapshots. Of course, you must be able to shoot under ordinary room lighting—unless your camera has an E2.5 lens, or faster—but you will find ample opportunity in places where the light is better.

For instance, do you have a picture of Dad, or Uncle, or Brother lighting his pipe? Nothing could be more characteristic—and yet it's the sort of thing you'll never find in an ordinary posed photograph.

To get such a picture you have to be ready to take advantage of a fleeting opportunity. Some day, when you have your camera out for some shots around the house, your pipe smoker is quite likely to come out on the porch to watch you. Maneuver so that he is in fairly good light, focus your camera for the distance between him and your lens, watch for the moment he puts match to tobacco and then—snap! turn and snap him. Chances are he won't realize what you have done. And you will have a "candid camera" shot to enjoy.

A whole section of your album may be devoted to such snapshots. Certainly they are interesting; more than likely they'll be amusing, too.

It is essential that you use the fastest kind of film for these snapshots for you usually have to take them under handicaps. Modern super-sensitive film is remarkable stuff; you should know it, anyway.

Fast film, a clean lens working at its widest opening, a watchful eye and quiet, unobtrusive camera work—these are the only essentials for many "candid" snapshots.

JOHN VAN GUILDER.

Indian States Pay High Tribute To Lord Willingdon By Erecting Statue In His Honor

B.C. Salt Fish

This Is The Latest Commodity To Come Under Marketing Act

Salt fish from British Columbia waters is the latest commodity to come under a marketing scheme. Announcement was made of the approval by the cabinet of a scheme for the marketing of salt herring and salt salmon produced in British Columbia.

The Dominion marketing board under the Natural Products Marketing Act has a number of other schemes under consideration, including livestock and poultry schemes for Western Canada.

British Columbia, however, leads all provinces in taking advantage of the act, for besides its salt herring and salmon products it now has its red cod shadings and its tree fruit under regulation of marketing boards.

The scheme was adopted on the application of the meal, oil and salt fish section of the Canadian Manufacturers' Association in British Columbia. The local marketing board will consist of two members appointed by that organization, two by Canadian Salt Fish Exporters, Limited, and a chairman to be appointed by the deputy minister of fisheries for Canada.

The local board will have power to regulate the time and place of the marketing of the regulated products and the quantity and quality to be released for marketing. It may also conduct a pool for the equalization of returns.

The livestock scheme is proposed by the Saskatchewan Co-operative Livestock Producers, Limited, and applies only to that province, but similar schemes are being prepared for Manitoba and Alberta, and all are designed to fit into a general plan to control livestock marketing over the whole of Canada. Opinions of the producers are being sounded out before proceeding further.

The provincial boards would be linked through a sales agency and all products apart from those for local consumption would be handled by the sales agency. All producers would be registered, all sales pooled and all packers and dealers, whether wholesale and retail, licensed.

Agricultural Economy

To Procure Information Of An International Character

The International Institute of Agriculture at Rome is planning to ask 74 governments for data on which to base recommendations for world planning in agricultural economy.

Its move followed unanimous approval of the proposal made by Dr. Henry Charles Taylor, United States permanent delegate to the institute, to change the organization's direction along lines of international planning.

As soon as possible the institute will begin its new work, rendered possible by the resolution endorsing Taylor's proposal. It declared the action had been taken "as a means to improve the quality of work and to meet the needs of the time for agricultural information of international character."

Interested In Kitchens

King George Likes To Cook When He Is Allowed

An amusing story of King George is told by Philip Inman, managing governor of Charing Cross Hospital, in his book, "Oil and Wine," just published.

The King, he writes, was passing along the corridor to one of the wards when he stopped before the door of the ward kitchen.

"May I go inside?" the King asked.

The door was opened and revealed a nurse bending down before a gas oven. The King took in everything at a glance and then said: "I'm very interested in kitchens. I sometimes do a little cooking myself—that is, when I'm allowed."—New York Times.

Wife: "No, I didn't sew a button on your trousers; I was too tired. Which is more important, anyway—your wife or your trousers?"

Husband: "Well, there are places I can go to without a wife."

The South Atlantic ocean contains islands which sealers have used for years, but have never seen. They are in a perpetual fog.

Approximately 4,000,000,000 pounds of tobacco are produced in the world annually.

It is an honor almost unique that the princes of the Indian states are paying Lord Willingdon, viceroy of India. They have subscribed funds with which a statue in his honor will be erected in New Delhi—"to express," in the words of the official announcement, "the high esteem and regard in which the Viceroy is held by the princes generally and to commemorate his long and distinguished connection with the country."

The success of Lord Willingdon's service as governor-general of Canada led his friends to believe he had the qualities demanded by the much more onerous responsibilities of his Indian post, and they have not been disappointed. In the Dominion he displayed democratic dignity, was an upholder of tradition, but not a stickler for form. His authority did not rest upon conventionality, nor was his influence bounded by the limits of his high office. He went to the trouble of learning Canada, of understanding the Canadian viewpoint, and in every branch of his public service he had the extremely competent support of his staff.

In the larger spheres of Indian affairs Lord Willingdon has demonstrated by these same qualities—and by a happy and rare combination of firmness with tact—his right to be ranked with the great pro-consuls of Britain. When he went to India something more than three years ago the country was rent with disorder, the fanatic Gandhi was a power in the land and the centre of disaffection and unrest, and there was serious resistance to the British plan of broadening self-government of the Indian people as they were educated to accept responsibility for their own administration. Since that time the Viceroy has not done anything spectacular, but the picture to-day is a vastly different one. Gandhi is in eclipse, his following largely gone. The country is peaceful, rarely finds its way into the news columns.

And this has been accomplished, we imagine, largely because Lord Willingdon is tactful and shrewd and kind, because it is known he will not tolerate violence, because his policy in India, as in Canada, is founded on common sense.—Ottawa Journal.

Leads In Literary Output

Russia Claims Production Of Greatest Number Of Books

Soviet Russia, a generation ago the most illiterate country of Europe, has been assessing its literary achievements and to-day boasts that in the production of books it has surpassed not only every other nation, but even the United States and Germany combined.

Just recently 500 Soviet authors met in the first All-Union Writers' congress, and laid down the general lines of Russian literature for the future.

In connection with their meeting, figures have been published that show the vast progress the Soviet has made in book publishing since the revolution.

Not less than five million books have been issued within the past 15 years.

Within the past five years the circulation of the writings of Maxim Gorki, the Soviet laureate, has been 18,945,000 copies.

Sholokov, author of "Still Flows the Don," has sold 2,106,000 books. And even poetry, ranking well below prose in other countries, has vast popularity in Russia. Official figures place the circulation of Denyan Bedny's verse at 7,400,000.

The yellow meal worm is a pest that is easily dealt with in winter time in Canada. With the meal or flour placed outside in a rat-proof receptacle, zero temperature will kill all the pests in a night. If the temperature does not go below 20 degrees Fahrenheit, it is better, says the Dominion Entomologist, to leave the food out two days.

Popular Anyways

Modern science has struck a blow at apple pie! Dr. Carl R. Fellers of the Massachusetts state college, said apple pie contains only about one-fourth as much vitamin C as the fresh apples with which the pie was made. Vitamin C is a mysterious quality in a food which prevents scurvy.

Great Britain and Ireland produce only enough meat to supply London's population with 3.2 ounces of beef, 3.2 ounces of mutton and lamb, and 2.8 ounces of pork per head each week.

Remarkable New Aid in Avoiding Colds—Samples Free at Local Druggists

Every Family in This Locality Offered a Free Trial
Of Vicks Va-tro-nol For Nose and Throat—Also
Of Its Ideal Companion, Vicks VapoRub

RESULT OF RESEARCH New Aid in Preventing Colds Leads to Plan for Better Control of Colds

PLAN EASY TO FOLLOW

Years ago, Vicks VapoRub introduced the modern method of treating colds. Now, Vicks Chemists have developed the ideal companion to VapoRub—Vicks Va-tro-nol—the new aid in preventing colds.

These two preparations, together with a few simple rules of health, form the unique Vicks Plan for Better Control of Colds. The helpfulness of Vicks Plan in reducing the number, duration and dangers of colds has been clinically tested by practicing physicians. (The Plan is fully explained in each Vicks package.) Here, briefly, is how Vicks Plan works:

To Help Prevent Colds
Watch yourself and children after exposure to any condition apt to be followed by a cold—such as: Contact with others having active colds—crowds, public places, stuffy ill-ventilated rooms—sudden changes in temperature, wet or cold, or unaccustomed exposures—excesses in living which lower resistance, such as over-eating, smoking, or drinking—after a hard day when you are overtired.

Then, if you have that stuffy, sneezy, irritation in the nasal passages where most colds start, use Vicks Va-tro-nol at once—just a few drops up each nostril. Used in time, Va-tro-nol helps to prevent many annoying colds, and to throw off colds in their early stages.

To Help Shorten a Cold
If a cold has developed, or strikes without warning, apply Vicks VapoRub over throat and chest at bedtime. Through the skin, VapoRub acts direct like a poultice. At the same time, its medicated vapors are inhaled with every breath direct to the inflamed air-passages. This combined double action through the moist linings—soothes irritated membranes—eases difficult breathing—helps break congestion.

During the day—any time, any place—use Vicks Va-tro-nol every few hours as needed. This gives you full 24-hour treatment without the risks of constant internal dosing, which so often upsets the digestion—especially of children.

Trial Packages Free
Your druggist has free combination packages containing trial sizes of Vicks Va-tro-nol and VapoRub—also folder telling how these twin aids to fewer and shorter colds are used in Vicks Plan for Better Control of Colds. Ask for yours—while your druggist's supply is limited.

WORLD HAPPENINGS BRIEFLY TOLD

Four common law criminals, all under 20 years of age, were executed by the axe in the court of the prison at Dessau, Germany.

Hermann Ganswindt, 78, the inventor who years ago conceived a project to go to Mars in a dirigible died recently at Berlin.

Third man to join the old Royal North West Mounted Police when it was formed in Ottawa in the early 70's, James McKernan, 83, is dead at Edmonton.

A direct tax on industrial payrolls which would raise \$200,000,000, lies at the heart of the new unemployment insurance plan now being worked out for presentation to the next United States congress.

A new rose, shown for the first time at the National Rose Society show at Horticultural Hall, Westminster, has been named "Princess Marina". It has velvety salmon petals tinged with orange.

Charged with participation in Communist activities at the University of California at Los Angeles, John Burnside, president of the Associated students, and four other students have been suspended for one year.

Registration and fingerprinting of all persons in the United States, as a means of weeding out undesirable aliens, was advocated in a report submitted to the state chamber of commerce.

George Walker, K.C., solicitor for the Canadian Pacific Railway Company at Calgary has been appointed assistant general solicitor of the company with offices in Montreal, E. W. Beatty, president of the railway, has announced.

"Mrs. Brown," cried Mr. Smith to his neighbor, "have you spoken to your boy about mimicking me?"
"Yes, I have," replied Mrs. Brown. "I've told him not to act like a fool."

Of the 254 lives lost in Canada's 46,000 fires last year, 142 were children, 67 of whom were burned in their homes during the absence of responsible persons.

SUNDAY SCHOOL LESSON

NOVEMBER 11

THE CHRISTIAN CITIZEN

Golden text: "All they that take the sword shall perish with the sword." Matthew 26:52.

Lesson: Galatians 5:13-26.

Devotional reading: Micah 4:1-5.

Explanations And Comments

Live at Peace With One Another, verses 13-15. The people to whom Paul wrote this letter lived in Galatia, the Roman province which extended north and south across the central plateau of Asia Minor. In Southern Galatia were the cities where Paul founded churches on his second missionary journey—Antioch in Pisidia, Iconium, Lystra and Derbe. He visited Galatia again on his third missionary journey, and two or three years later wrote this letter.

In the beginning of the fifth chapter, Paul tells his readers that Christ sets them free from the bondage of the old law, and urges them to hold fast their freedom. Then in our lesson text he tells them not to err in thinking that freedom from the requirements of the law means disobedience to its spirit, which is that of love to others. "To men who have been accustomed to think of law as the only obstacle to free self-indulgence, or to those who have not been accustomed to high ethical standards, freedom from the law was easily taken to mean that for the Christian there is nothing to stand in the way of the unrestrained indulgence of his own impulses. Of this danger Paul is well aware (Rom. 6:1; Phil. 3:17; Col. 3:1), and beginning with verse 13, he addresses himself vigorously to meeting and arresting it."

Brothers, wrote Paul, you are free from the law, but Christian liberty does not mean that you can do as you please. Liberty and license are not synonymous. Do not use your freedom as a license for indulging your lower impulses, but live in accordance with the law of love. "Flesh" is used here for "that element of man's nature which is opposed to goodness and makes for evil. It signifies the entire potency of sin." Through loving service for others, continued Paul, you fulfill the whole divine law, which is, Thou shalt love thy neighbor as thyself.

"A Christian man is the most free of all, and subject to none; a Christian man is the most dutiful servant of all, and subject to all" (Martin Luther).

Then, remembering that the Galatians were prone to quarrel, Paul adds, "But if ye bite and devour one another (that is, if you are like dogs tearing at one another), you destroy one another (one another's spiritual life)."
"No man resolved to make the most of himself can spare the time for personal contention. Still less can he afford to take all the consequences, including the vitiation of his temper and the loss of self-control."

Little Journeys In Science

GLASS

(By Gordon H. Guest, M.A.)

Historians tell us that the Egyptians discovered how to make glass. The production of glass on a large scale started in Egypt about 1370 B.C. Alkali (sodium carbonate) was melted with crushed quartz, limestone, and copper compounds in crucibles to give a blue glass. Glass made in Egypt was shipped to all parts of the Roman Empire.

Science has shown the modern manufacturer how to produce many new and useful kinds of glass. Ordinary glass, which is composed of soda, lime and sand cracks readily when suddenly heated or cooled. If common glass is heated strongly it softens, and vessels made from it change their shape. The addition of boron compounds and certain metallic oxides to the formula of ordinary glass produces a type of glass known as Jena glass, which can stand high temperatures. Recently scientists have produced pyrex glass by replacing some or all of the lime with aluminum or some other salts.

Pyrex glass is strong and stands changes in temperature so well that cooking dishes can be manufactured from it. Silica, commonly known as sand, can be converted into a transparent glass known as silica glass, which can be heated to redness and plunged into cold water without being fractured.

Optical glass for lenses of all kinds is produced by adding lead oxide to the glass mixture. Optical glass must be free from all color-producing materials and must also be free even from microscopic bubbles or stringy wastes. Cheap imitations of gems are made from glass very rich in lead (lead glass), and the glass of which cut-glass vessels is made is of this same kind but it contains less lead.

Recently a plate glass has been produced in England which has special strength and toughness. The glass does not splinter when broken, but forms small comparatively harmless fragments. This toughest glass is about five times as strong as ordinary plate glass.

Hungarian soap makers are turning out soap cakes with bake-life tablets in the middle bearing the factory's name or trade mark, thus reminding the user of the brand when the soap is about used up.

Civil Service: A merit system that gives the job to the best man who belongs to the right party.

Dixie Plug gives pipe-smokers a fresh, satisfying and economical smoke—always! You cut each pipeful as you need it—that's freshness. You cut it to suit your taste, coarse or flake—that's satisfaction. It lasts longer in your pipe—that's economy.

DIXIE PLUG SMOKING TOBACCO

Was Familiar Character

"Old Matt" Was Carriage Attendant In London Thirty Years

"Old Matt," a familiar character in London, who is estimated to have opened the doors of more than 2,000,000 private cars, taxicabs and hansom cabs, had died in that city, aged 74. His name was Walter Matthews, and for thirty years he was the carriage attendant outside Simpson's in the Strand. In his youth he was a noted boxer, and later went to New York as a butler. Since returning to London he declined several offers to return to the United States.

The bridegroom was in a poetic frenzy as he strolled along the shore. "Roll on, thou deep and dark blue ocean, roll," he recited to his bride.

"Oh, Gerald," she exclaimed, "how wonderful you are. It's doing it."

A Clever Artist

English Artist Uses Wood For Canvas And Picture

At Southampton lives one of the most unusual artists in the world—a carpenter who "paints" pictures with pieces of wood. He uses three-ply wood for a canvas and in one of his pictures—showing a tree in leaf—nearly 3,000 pieces of wood were used. He obtains light and shade effects by selecting the right grain markings. It is impossible to detect joins when the pictures are finished. They are coated with a clear white polish and framed in ebony. Rare and expensive woods from all over the world go to the making of these unique pictures. Some woods are so brittle that they must be cut with great care before being glued into position. When the artist admitted six of the pictures at an exhibition in London she was informed they had taken four years to complete.

Lumbering In B.C.

In the first eight months of this year, the British Columbia log scale was 1,297,000,000 feet, an increase of 5 per cent. over the corresponding period last year. In the month of August, the scale was 206,000,000 feet compared with 169,000,000 feet in August, 1933.

The 1933 score for bank failures was as follows: United States 3,500—Canada 0. Who won?

Robot Guides Dirigible

Model Of Wireless-Controlled Airship Is Being Tested

Experiments are being made in Tills with the model of a wireless-controlled airship. The length of the model is 30 feet, and it carries no passengers but a "mechanical man" in the shape of a complicated wireless apparatus. It is intended that by means of another wireless on the ground the dirigible shall be made to ascend and then to be steered in any direction. It is hoped, according to Reuter, that it will be possible to make the airship drop propaganda leaflets over any place to which it may be sent.

FEAR OF WAR HAS A STRONG GRIP ON FRANCE

Paris.—Allegations of Germany's increasing military might intensified the war scare grip on France.

In great measure the fear of conflict, which overshadowed All-Saints Day pilgrimages of the French people to the graves of their war and civil dead, was based on belief the approaching plebiscite in the Saar might set off an international explosion.

For the first time since the war, the French apparently were not so confident of the crushing superiority of their army, leading minister of war Henri Pétain to seek urgent reinforcements for the nation's weapons of defence.

Violent reaction in the German press to the announcement that French troops are ready to enter the Saar if the League of Nations commission governing that region calls for help was described in high quarters here as clear indication that the Nazis have been thinking of seizing the rich industrial area.

The Saar basin, now under League of Nations mandate, will vote January 11 whether to remain under league rule, rejoin Germany or unite with France.

Rumors of an impending Nazi putch in the Saar were followed by an announcement that French garrisons along the border were ready to move, and an official government newspaper in Berlin stated that the French "are playing with fire."

Nothing To Conceal

Britain Prepared To Give Every Assistance To Arms Inquiry

London.—The British government, having "nothing whatever to conceal," plans to give all factions opportunity thoroughly to air the international arms traffic situation.

A statement Prime Minister Ramsay MacDonald made in the House of Commons indicated Great Britain, several of whose armaments firms were mentioned in the Washington arms inquiry, is desirous of having the entire situation searchingly reviewed.

The prime minister's declaration that the government has "nothing whatever to conceal" followed hard on the heels of assertions by Sir Bolton Eyre-McNeill, first lord of the admiralty, that allegations that Vickers-Armstrong, British munitions firm had a "friend in the admiralty," were untrue.

For Another Speed Record

Malcolm Campbell Preparing Bluebird For Trials At Daytona Beach

London.—The remodeled Bluebird racing car which Sir Malcolm Campbell expects to take to Daytona Beach, Fla., early in January for another assault on his own world speed record of 272.008 miles an hour is rapidly taking shape in his workshop on the outskirts of London.

Although declining to reveal the scope of the alterations until they are completed Sir Malcolm, who is 49, told the Associated Press the new Bluebird would look "quite different" from the old.

"I have real hopes of beating the present record and possibly exceeding 300 miles an hour."

Trade With Newfoundland

Tariff Reductions Have Good Effect On Trade With Canada

Ottawa.—Tariff reductions announced by Newfoundland's commissioner of public utilities will, it is anticipated, have a beneficial effect on Canada's trade with Newfoundland.

In the three months ended June 30 of the present fiscal year, Canada exported merchandise to the value of \$1,832,425 to Newfoundland. Exports of wheat flour, totalling 73,116 barrels, were valued at \$296,106. Imports from Newfoundland during the same three months amounted to \$197,367.

Flight Is Postponed

Dublin.—The attempt of Col. James C. Fitzmaurice to establish a new flight record to Melbourne has been indefinitely postponed. The plane, the "Irish Sloop," was made ready for return to the factory in the United States for alterations. Eric Bonar, co-pilot, will return with the plane to the factory.

W. N. U. 2071

Probe Munitions Sale

British Government May Investigate Private Manufacture of Arms

London.—The British government has decided to establish an inquiry into the private manufacture and sale of war materials. It was stated in political quarters. Official confirmation, however, was lacking for the present.

The Daily Mail said the government's decision was partly a result of the senatorial inquiry at Washington and also partly because of a deadlock in the disarmament conference.

It was believed the government also would propose other nations join a conference to discuss the manufacture and exportation of arms with a view to securing a convention establishing international control.

Such a conference, it was suggested, might take the place of the disarmament conference.

Announcement that these steps have been determined upon, it was stated, will be the government's answer to labor's demands in the House of Commons and suggestion of the admiralty for an independent inquiry into the placing of contracts for naval construction.

Completes Long Flight

Melrose And Hanson Reach Melbourne On November 1st

Melbourne, Aus.—C. J. Melrose, the solo flying Australian, and Leutenants Hanson, the Dane, both had completed the London-to-Melbourne flight Nov. 1st, coming in seventh and eighth, respectively.

When Melrose buzzed between the pylons at Fintona race-course his reputation for coolness was considerably enhanced. Tagging behind him came the tale of how when he was lost 18 miles from Charleville he landed and hailed a passing motorist seeking directions.

"It's a casual customer all right," said the motorist later, adding his verdict to that already expressed in England a month ago when the flyer stepped from the cockpit after an eight day and nine hour flight from Australia with as little ostentation as if he had made a hop from the nearest airport.

Urges Development Of The Tourist Industry

Director Of Canadian Travel Bureau Addresses Boston Club

Boston.—Development of the tourist industry between Canada and the United States can "forge a new instrument for peace" between the two countries, said D. Leo Dolan, of Ottawa, in addressing the Canadian club of Boston.

Mr. Dolan is director of the recently-established Canadian travel bureau; and he urged an ever increasing tourist traffic between the United States and Canada.

The people of the United States had spent on travel last year "the astounding figure of \$5,000,000,000," said Mr. Dolan, stressing "the great need of reciprocity of travel between the United States and Canada." Last year, he said, estimates showed Canadian travellers spent approximately \$40,000,000 in the United States.

Sedition Measure

British Government's Intention To Change Disaffection Bill Subject To Change

London.—The government's intention to Disaffection bill passed through report stages in the House of Commons but several amendments were written into it during the brief two-day debate.

An amendment by the labor opposition providing a search warrant should be issued only by a high court judge and not as originally proposed in the bill by two magistrates, was accepted by the government. A further change was made when the government accepted an amendment providing no prosecution could take place without the consent of the director of public prosecutions.

The bill purports to check distribution of seditious literature among the forces of the crown.

First Criminal Court

Court Room At The Pax Crowded When Sessions Open

The Pax Man.—More than 200 persons took the morning train from the north and the cities of the south crowded the rooms and corridors of the community building to attend the first criminal sessions of the court of the king's bench ever held in The Pax. Mr. Justice J. A. Adamson, Winnipeg, presided. There were 15 charges and nine indictments on the list. The charges arose out of the strike at Flin Flon on June 30.

Baptize Quintuplets

Ceremony Is Performed At Age Of Five Months And Two Days

Callander, Ont.—Solemn ceremonies of baptism of the Roman Catholic church for the Dufour quintuplet sisters were performed at a private service at the Dafoe hospital. Rev. E. T. McNally, parish priest of Corbell, officiated.

The ceremony, performed five months and two days after the babies' birth, was a simple one. It was witnessed by members of the families of both Mr. and Mrs. Oliva Dionne, the parents, and others, including Moise Legros, father of Mrs. Dionne; Miss A. Dionne, sister of Oliva Dionne; Dr. A. R. Dafoe, the attending physician, and five godfathers and godmothers.

PRIME MINISTER ANSWERS LETTER OF HON. STEVENS

Ottawa.—Suggesting that the memory of Hon. H. H. Stevens with respect to events leading up to his resignation as minister of trade and commerce, was at variance with the recollection of my colleagues and myself, Prime Minister R. B. Bennett, in a letter, expressed the opinion no useful purpose would be served by further correspondence.

Mr. Bennett's letter was in reply to that sent him by Mr. Stevens in which the latter stated at some length his criticism of the prime minister and his colleagues, and dealt particularly with the communication sent him accepting his resignation.

The prime minister's letter to Mr. Stevens was sent to the former minister following a brief session of council, and a short time later copies were made available to the press.

In the meantime rumors circulate widely of impending cabinet changes but no announcements in this regard are anticipated until the return of Hon. R. J. Manion, minister of railways and canals.

Mr. Bennett's letter follows:

"Dear Sir:

"I received your letter of yesterday in due course.

"As you resigned as minister of trade and commerce and chairman of the royal commission rather than resign, as proposed, the amicable discussion with your then colleagues, which, by consent, was adjourned on Thursday last, when all the relevant papers to which you refer were available to you, no useful purpose will be served by anticipating parliamentary discussion and continuing the correspondence with respect to events of which I think it proper to state that your indicated memory is at variance with the recollection of my colleagues and myself.

"Yours truly,

(Sgd.) "R. B. BENNETT."

New Locks Ordered

Hatton, Warwickshire.—A new boat was given inland waterways in England when the Duke of Kent opened the new locks on the Grand Union canal between London and Birmingham. The ceremony marked the completion of a \$3,000,000 improvement which began in May, 1931.

SCORES VICTORY

Herman Trelle recently scored another wheat victory—but this time against the elements. Poor weather conditions played havoc with crops in the Peace River district around harvest time, but they descended upon Wembley too late. Mr. Trelle had completed his harvest.

Bright Students

Third Grade Pupils In Toronto Schools Can Answer Questions

Toronto.—Two Toronto senior third grade public school classes claimed marked superiority over similar bodies in London, Ont., when several students correctly identified Prime Minister R. B. Bennett and Premier Mitchell F. Hepburn of Ontario.

Major R. J. Blaney, of Wilkinson school, said 15 of 33 pupils in the senior third grade of his school knew R. B. Bennett was prime minister of Canada and that 23 of the same group could identify Premier Hepburn. Twelve others had heard of Mr. Bennett but could not describe his office, and two appeared never to have heard of him.

Ten students did not know who Mr. Hepburn is.

Seven knew "Dizzy" Dean was a baseball player, five knew he played for St. Louis Cardinals, but the remaining pupils had never heard of him.

In a North Toronto public school, 12 third grade pupils correctly identified Mr. Bennett, five described him merely as premier, one as "governor of Ontario," two as prime minister of Ontario, one as "secretary" of Ontario and one as "president of Canada."

Will Claim Damages

American Flyers, Detained In Persia

Calcutta, India.—John Wright and John Polando, American flyers in the Melbourne derby, who were detained near the Persian border for more than 24 hours, said they intended to claim damages from the Persian government.

After stripping their engine, they were amazed to find a faulty cylinder was not cracked, as they first believed, and they may now continue the abandoned flight to Melbourne. Otherwise they will sail from Bombay for London, November 10.

Their purpose in returning to London is to discuss their detention in Persia with the air race committee.

HON. H. H. STEVENS RESIGNS

Hon. H. H. Stevens, Minister of Trade and Commerce, who resigned from the Cabinet on the mass buying issue. The resignation came after his alleged refusal to retract utterances made while chairman of the Royal Commission on Price Spreads and Mass Buying.

Discuss Meat Imports

Britain Submits Memorandum For Future Discussions With Dominions

London.—Conversations between British representatives and delegates from the Dominions concerning the United Kingdom's meat imports were resumed at the Dominions office and it is understood the Britons submitted a memorandum which will form the basis of future discussions.

The memorandum, it was learned, has been cabled overseas to the governments of the various Dominions for their observation. Meanwhile discussion on the question, of vital significance to British farmers as well as to the Dominions, has been adjourned for at least a fortnight.

Canada and the other Dominions were represented either by the high commissioners or their representatives. Walter Elliott, minister of agriculture, and J. H. Thomas, Dominions secretary, with other British government officials were also present.

WHEAT PRICES TO BE PEGGED FROM NOV. 1ST

Winnipeg.—Effective Nov. 1, wheat prices will be "pegged" at 75 cents a bushel for the December future, and 80 cents a bushel for the May future, it was announced here by the Winnipeg Grain Exchange.

The pegging of the price, on a Fort William basis, was made by the grain exchange at the request of the federal government. John I. McFarland, general manager of the central selling agency of the Canadian Wheat Pools, declared the renewal of outside selling recently complained of had caused the pegging.

Text of the Winnipeg Grain Exchange statement follows:

"The government has requested that minimum price be set on May and December wheat contracts of 80 cents and 75 cents respectively. Fort William basis, these to take effect November 1, and the government wheat agency to take hedge on grain purchases. The council of the exchange has acted in accordance with this request."

Duration of the pegged price was not set. Last year, from August 15 to September 14, a pegged price of 70 cents a bushel on the October future was in effect. The October contract for this year terminated Wednesday and only the December and May futures will appear on the board to-day, with the July future being added later.

The peg keeps the December option price at the level of the market's close Wednesday, 75 cents a bushel. A gain of 1/2 of a cent will be necessary in the May future, which closed at 79 1/2 cents a bushel.

Reference in the grain exchange's official statement that the government agency would take up hedge on grain purchases was interpreted as assurance a market would be provided for the Western Canada farmers' wheat. It was also done to enable elevator companies to function in a normal way in the Dominion.

The announcement came from the exchange president, Roy W. Milner, after an emergency meeting of the council.

Mr. McFarland, informed of the council's action, said immediate government action had been found necessary because of resumption of heavy selling in the Winnipeg pit by interests outside the Dominion.

A month ago, Mr. McFarland, who conducts federal government stabilization operations in the Winnipeg pit, made the charge that outside influence was directed at cutting down Winnipeg wheat prices. Two days ago he recommended to the federal government that control and restriction of the Winnipeg pit operations be made effective. He also declared government stabilization efforts would continue.

"There is evidence that the Winnipeg market is still the target of interest foreign to the wheat producer of Western Canada," said Mr. McFarland in commenting on the exchange council's action. "While the government has in mind certain restrictions that will prevent operations witnessed the past few months, it will take some little time to put these into effect."

"In the meantime, the government is not prepared to stand by and watch the demoralization of the Canadian farmer's market by interests outside the Dominion, and has therefore asked the officials of the Winnipeg Grain Exchange to 'peg' prices until such time as regulatory action can be taken."

LABOR MAKES HEAVY GAINS IN BRITISH VOTING

London.—Labor registered sweeping gains in returns available here from municipal elections held all over England. The heaviest losses were suffered by the Conservatives.

The results were watched with keen interest because the elections are regarded as an unusually important test of public opinion in view of the probability of a general election next year.

The results in London district showed a strong swing to the Labor side but in many municipalities in that district the turnover still left the municipal reform party ahead. The municipal reform candidates are broadly classified as Conservatives.

With 98 results complete throughout England and Wales, the results showed Labor had made 203 gains against eight losses; the Conservatives had gained 13 seats against 100 losses; the Liberals had gained four and lost 34 and Independents had gained five and lost 74.

With results in 11 London boroughs still to come, the result in London district showed Labor had gained 227 seats and lost one; the municipal reform (Conservative) group had lost 210 and gained but one while Independents and others had lost 17.

Battersea was one London district where the Laborites captured enough seats to turn a municipal reform majority into a Labor majority.

Voting in London was watched particularly because of the preparations for the first municipal voting since the general elections of 1931. In that area 28 boroughs vote only once every three years. London elections were complete but elsewhere only one-third of the council membership was to be decided.

A National Emergency

Churchill Warns Britain That Germany Is Re-Arming Rapidly

Woodford Bridge, England.—Winston Churchill warned Britain that Germany, re-arming "secretly, illegally and rapidly," will have "over-taken us before another year has passed" in "organized military machines alone."

"A reign of terror exists in Germany in order to keep secret the feverish and terrible preparations they are making," the former chancellor of the exchequer told his constituency.

"Vice-premier Stanley Baldwin has said our frontiers are the Rhine."

"Can we be sure that the men in control in Germany will not reply to that: 'Our targets are the Thames?'"

A national emergency is approaching, Churchill said, as he attacked the National government for what he said was its laggardness in completing the program for air defence.

Churchill declared the approaching emergency must be faced "with energy and courage if a safe, coherent and peace-keeping policy is to be found."

King Boris Drives Train

Takes Place Of Engineer Who Was Seriously Burned

Sofia, Bulgaria.—King Boris risked his life to save an engineer from death in his burning locomotive, and then himself took the throttle to bring the train more than 100 miles to Varna.

The king left his special car, attached to the train, near Strazica when fire broke out in the coal tender. Noticing the engineer's clothes were aflame, he climbed into the cab and pulled the burning garments from the man's body.

After arranging for medical care for the seriously injured engineer, Boris took the driver's place and drove the locomotive the rest of the way into Varna.

Rocket Mail Tested

Trieste, Italy.—A steel tube was rocketed from the side of a mountain near here, and landed undamaged in a valley 2 1/2 miles away, with a cargo of 1,600 letters. The demonstration, testing a speedy means of transporting mail between nearby points, was termed a success by its inventor, Gerard Zucher.

New German Stamps

Berlin.—The reich government announced that a series of postage stamps will be issued depicting "the peaceful activities of the German people." The stamps, which will be of five to seven pfennigs in value, will be issued early in 1935 and the proceeds devoted to charity.

Canada's Egg Market

Grading Regulations Improved Quality And Ensured Good Prices
Canada is the highest priced egg market in the world, and credit, in some measure, for this enviable position in these days of low prices for agricultural products must be given to the Canadian egg grading regulations. The egg regulations were designed to improve prices and marketing conditions and the quality of eggs placed in the market. In the various activities of the egg inspection service none is regarded as more essential than that of preventing eggs of an inferior grade being sold under a higher grade. The quality and grading of eggs in wholesale and retail stores is subject to continual supervision by officers of the Canadian Department of Agriculture egg inspection service.

Supplying Canada's own demands for eggs is a most important business. The total production of Canadian farm eggs in 1933 was approximately 210,585,000 dozen with an estimated value of \$26,345,000. These figures relate only to eggs produced by hens on farms, and do not include the eggs of urban poultry. Canadians are generous egg eaters, and during 1933 each person in Canada consumed, on an average, over 21 dozen eggs. Altogether Canadians consumed 229,146,612 dozen eggs, which was close to nineteen million dozen in excess of the eggs produced on farms.

New Toys More Realistic

Streamlined Effect Is Being Introduced In Many Ways

Streamlined stunts, with a spare roller and a tall light—that is what Santa Claus is going to bring many good kiddies this Christmas.

Toys, according to a preview at Santa's workshop at the North Pole, will be more realistic and more durable.

Toy automobiles will have streamlined effects, "pants" over the wheels and really be a miniature model of the real thing.

Little sister's dolls will not be so large, but will have real human hair, flaring eyes and smooth, flesh-colored bodies. Some will eat and drink. Her stove will be electric and there will be a separate switch for the coils in the oven.

Bicycles, scooters, wagons and velocipedes, too, are following the trend to streamlines. In addition to all those improvements, the new wagons, scooters and other toy vehicles will have pneumatic tires.

The toy makers have done big things for the kindergarten youngsters. Toys this year will have more educational features than ever. Small dumbbells have just enough weight to give the youngsters good muscle building as he swings them.

Several new adult games are being brought out. One of the most popular is expected to be "monopoly" in which four to 14 may play. "Sorry," an English game, "Igo," from Japan and "Harten" are other adult games on the market. Backgammon is due for a comeback.

Due to changes in the money exchange, there will be fewer imported toys. Christmas tree ornaments may cost more because few are made in the United States. The same holds true with miniature glass dolls, according to workers in the North Pole Toy Shops.

Teachers Learn About Weeds

Every Sort Grown At School Near Belfast, Ireland

Weeds are encouraged to grow in a garden which is beautifully kept at an elementary school near Belfast, Ireland. Under the guidance of the ministry of education 25 teachers are being taught how to teach horticulture to the scholars in the rural area. Every sort of weed is grown in ordinary fashion. There are neat little rows of regular garden pests which drive the amateur gardener to despair. They are fostered and tended as if they were orchids. By careful examination of the specimens the students get to know a lot about weeds and there will be a great slaughter when they return to their own school gardens.

Friends Of Japan

Canada is Japan's nearest neighbor and the Japanese people remember the sympathies and understanding which the consensus of opinion in Canada has always manifested toward the general policy of Japan. Hon. Iyemasa Tokugawa, Japanese ambassador to Canada, told members of the Winnipeg Board of Trade.

Two famous bells, the "Maria Gloriosa" and the "Emperor," were cast from the metal of 42 French cannon taken by the Germans in the war of 1870.

W. N. U 2071

Fish Livers Bring Good Price

As A Result Of Research Work Waste Material Now Worth Money

Fish livers were formerly only so much waste, except cod livers, but research is changing that. Halibut and swordfish livers, for instance, are now worth money to Canadian fishermen because Research found out that they contain an abundance of the same health-building vitamins which give cod liver oil its high medicinal value. The livers, usually shipped in ice cans so that they will retain their freshness, are sold to pharmaceutical companies which extract the oil from them and market it in medicinal preparations.

Sales of halibut livers netted Dominion fishermen about \$49,000 last year, quite a tidy sum to get for material that used to be thrown away as useless until a year or two ago, and this year Nova Scotia fishermen are finding a sale for swordfish livers. Swordfish are big fish with big livers so the fishermen are likely to do fairly well out of the new business; at all events, they are getting something for what used to be worth nothing, and with little extra effort, for swordfish are always cleaned before being shipped to market.

Swordfish are not taken on the British Columbia coast—nor, for that matter, anywhere else in Canadian waters except off Nova Scotia—but it is in Pacific areas that the Dominion's largest halibut fishery is carried on and it is there, of course, that most of the business in halibut livers is done. Out of the 250,000 pounds of halibut livers sold by Canadian fishermen last year over 229,000 pounds came from British Columbia sources and the remaining quantity from Nova Scotia. The average price, both East and West, was twenty cents a pound and this year's price is understood to be much the same. Sales of halibut livers have been in progress for several years but it was only recently that the vitamin content of swordfish livers was determined and a market for them thus created.

Praise For Canadian Rockies

More Magnificent Than Alps States World Traveller

"If the people of Europe and United States only knew of the magnificence of the Canadian Rockies and the beauties of the Pacific coast, your tourists would be numbered by millions instead of thousands."

This was the impression voiced by H. V. Morton, Sunday editor of the New York American, who, with Mrs. Morton, boarded the C.P.R. Seattle boat, terminating their first tour of the coast.

"Yes," he said, "while I have travelled extensively over all the world this is my first visit to Canada, and now I am beginning to realize what pleasure I have denied myself."

"The dry air of the prairies, the brilliant, yet not withering sunshine, and the bracing climate of the mountain region would be enough to repay me for any distance travelled, but—the Rockies alone! The Alps cannot even approximate their majestic grandeur and beauty. I am certainly looking forward to seeing them again."

Hardships Not Known

Suffering Caused By Depression Not Reflected In Relief Lists

The relief lists don't anywhere near represent the total loss by unemployment and the full burden of hardship now being borne by the general public. Hardly a man anywhere who is earning a living—a very much depreciated living as a rule—but has felt compelled to assume, from motives of compassion, the burden of some less fortunate ones.

It's easy to be glib and say that the jobless should have saved for a rainy day—a rainy five years for most of them—and that "it's always possible to get along somehow." But how does it work out in actual life? The half has never been told of the suffering and deprivation in Canada caused by our man-made depression. Certainly the relief lists, appalling as they are, do not reflect it. Edmonton Bulletin.

A Quick Thinker

"Who owns those ferryboats I tripped over coming down the stairs just now?"

The landlady gave a fierce look. "Ferryboats, indeed!" she gasped. "I'll have you understand they are my shoes."

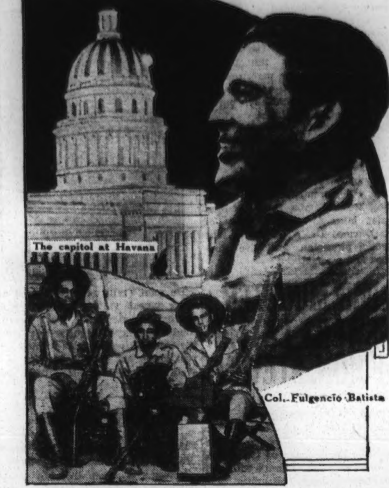

The boarder gaped uncomprehendingly. "Did I say ferryboats?" he hastily asked. "I meant 'fairy boots'."

First Gossip: "What does Miss Squille remind you of?"

Second Gossip: "A peninsula, of course."

First Gossip: "Oh, yes, a narrow neck stretched out to sea."

VIRTUAL DICTATOR OF CUBA

One man holds turbulent Cuba in the hollow of his hand, and that man, according to reports, is Colonel Fulgencio Batista. Only thirteen months ago Batista was a sergeant in the revolutionary army under former President Machado, and now he commands the army. To be sure, Cuba has a constitutional president, Carlos Menéndez, but Colonel Batista is the "court of last resort" in the opinion of political observers. Above are views of the capital of Havana, Colonel Batista, and part of Cuba's defence equipment.

Col. Fulgencio Batista

Ginseng Root Grows Wild

Cultivation Calls For Expensive Equipment And Special Technique

Ginseng root is produced in Canada for export to China, where it has been cultivated for thousands of years for its medicinal properties. The word itself is from the Chinese and means "form of man." It derives its name from the appearance of the root. When dry, the root is steeped and used much in the same way as other medicinal herbs. Ginseng grows wild over a large part of Canada, and was well known in the early French colonialists. Its cultivation involves special technique and rather expensive equipment, as it must be grown under shade and soil conditions must approach those found in the forest. It is not until the fifth or sixth year from the planting of the seed that the root attains sufficient growth for pulling and drying for market. Its cultivation is highly localized but is reported profitable where suitable conditions are reproduced.—Toronto Saturday Night.

Big Poultry Plant

American Interests Reported To Be Sponsoring Plans

Chicago and New York financial interests are reported sponsoring a scheme to erect a \$500,000 poultry farm, at Clinton, Ont., for the production of eggs.

The report said the plant would be one of the largest of its kind in the British empire.

The sponsors of the poultry plant were reported also to be considering equipping 400 persons in manufacture of salt, soda ash, acids and synthetic ammonia.

Twelve per cent of the motor licenses issued in England are held by women.

Alaska's flag carries the symbol of the Great Dipper and the Pole Star.

Bottled Canadian Honey

Canadian Honey Is In Demand In British Isles

Canadian honey is enjoying increasing popularity in the British Isles, and bottled Canadian honey seems to be the demand of the British consumer. In a survey taken recently it was found that the glass jar was by far the most popular type of container for extracted honey in the shops of Britain. In London 92 per cent of the shops stocking honey showed glass jars, while in Glasgow the percentage was 94. The almost universal use of the glass jar container is attributed to the fact that it shows the clearness and colour of the honey, and presents a clean appearance.

In 1933 Canada produced 19,543,500 pounds of honey, which, at an average of 9 cents per pound, was valued at \$1,760,800. While production was up some 70,000 pounds over the preceding year, on account of the average value being up a cent a pound, the total crop value shows an increase of \$36,700. Canada's exports of honey during 1933 increased 22.1 per cent over 1932 and the value increased 45.9 per cent. Exports amounted to 2,806,770 and were valued at \$281,057. The United Kingdom was Canada's best customer, purchasing 2,213,899 pounds valued at \$254,048.

In the production of wheat in 1933 Canada was in the eighth position with 269,729,000 bushels, being exceeded by Russia, China, the United States, British India, France, Italy and the Argentine. In the export of wheat in 1933, the Dominion led the world.

Money is a bother at any time. If you haven't any, you won't be happy until you have; and if you have much, you will be worried all the time about losing it.

London's police force now has nearly 20,000 men.

Advising The Farmer

Arm Chair Critics, Usually Have Lots Of Ideas

How easy it is for some persons with imagination and gifted with a flow of words to sit in a comfortable arm chair, feet cocked on a desk and dictate to a stenographer instruction how a farmer can better his conditions. One of these effusions recently reached our desk and here it is:

"The application of engineering to agriculture has for its purpose the utilization of engineering principles, methods, and equipment to decrease the unit costs of farm products, to reduce the amounts of income labor in producing crops and caring for livestock, and to increase the satisfaction of farm living."

What a wonderful thing this must be for the farmer. The application of engineering to farming is going to show him how he can be more easily, plow, sow and harvest; how best to unload his grain in the mow; cut and holt the corn into the silo; milk his cows with the minimum of energy and in the cheapest manner; weed the turnip patch and get the weeds out of his corn and potatoes while the farmer's wife is to be told how to perform her multiplicity of chores about the house so as to increase the satisfaction of farm living.

If the authors of some of the non-sensical stuff emanating from city offices were to write their articles, leave them on the desk until the following morning, and then read them before they began the work of the day, we feel sure much of it would find a place in the waterpail basket.—Perth Express.

Something To Remember

Nations Could Learn Much From "Slow Poke England"

When ever you hear people talking about "slow poke England" and its tendency to be cautious, here is something to keep in mind.

Since 1929 the world has been passing through the worst business depression it has ever known, yet, as Herbert N. Casson, Canadian editor of the London magazine Efficiency pointed out, in the period only one British department store had closed its doors and not one of the other department stores had even one year in which it failed to make a profit.

In that period not one railroad system has suffered a loss. One large hotel has been torn down to make way for an office building, but not one large hotel has gone into bankruptcy. And not one bank has failed. Canada can match that record as regards banks, but in other particulars it can hardly claim to do so, while some other nations will be hard put to match it at all.—Sault Daily Star.

Fortune Teller Was Right

Foretold Succession Of Sultan Fud To Throne Of Egypt

When a fortune teller in Paris informed Prince Fud he would die a king he laughed. He was far from the succession. Besides, Egypt had no king. In 1913 it looked for a moment as if the prophecy might come true. A king was wanted for Albania. Italy was said to support his candidature. But a German prince was chosen.

Then came the war. His nephew, the Khedive Abbas Hilmi, was deposed. Prince Fud's elder brother, Prince Hussein, became Sultan. Two years later he died. Sultan Hussein's son, renounced his rights. Prince Fud succeeded. When Britain abolished the Protectorate in 1922 Sultan Fud proclaimed himself king. The Paris fortune teller was right after all.—London Daily Telegraph.

Pari-Mutuel Betting

Less Money Wagered On Horse Racing This Year

Pari-mutuel betting in Canada this season was \$20,976,400, a decrease of \$4,161,100 from 1933, it was reported by the department of agriculture. This resulted from 295 days of racing divided between 40 meetings. The smallest amount was a two-day meeting at Red Deer, Alta., \$529.

With four tracks and 56 days of racing, Toronto led the wagering with \$8,965,500, almost \$1,000,000 more than last year. Winnipeg was second with \$2,408,000 from three tracks and 35 days of racing; Vancouver, third, \$2,252,500, three tracks, 42 days; Montreal, fourth, \$1,261,800, three tracks, 42 days, and Calgary, fifth, \$590,000, two tracks, 21 days.

The function of the liver is that of saving heat when the body is chilled or at the onset of fever, according to Dr. Henry G. Barbour of Yale.

Dundee has banned Sunday concerts for charity.

Superstition In China

People Seek To Lure Evil Spirits To Death Before Cars

There is no congestion in motor traffic in Kweitch, Honan, China, as there are only two automobiles in the city, that belonging to St. Paul's hospital and the other to the city magistrate, but nevertheless a driver must be very alert to avoid accidents, for in driving through the country groups of women and children run constantly across the road immediately in front of the car. It is not a game, but a serious business, the hope being that any evil spirit trailing them will be run down by the car if they get over just in time to save themselves but have the spirit still on the road.

Such is an example of the superstition that reigns in the hearts of the people of the district, the story of which formed part of the vivid and memorable address given in an Ontario city by Dr. R. F. Brown, graduate of the medical school at the University of Toronto, who has been at St. Paul's hospital at Kweitch for the past six years.

Other examples of the superstitions of the people were also told by the speaker—of how during the extreme heat of last year they were surprised at the unusual sight of the gods being placed in the fields, bronze, wood and paper gods, and were told that the people were giving the gods a taste of the weather they were giving them in the hope that, experiencing the heat themselves, they would see the necessity for sending rain. And once during extreme heat and prolonged drought, the south gate of the walled city was locked for some time, the people believing that the rain spirits come in through the north gate and determining that if they did come in they would not be allowed to get out until they had given rain.

Cause Needless Tragedies

Curious Crowds Hinder Those Who Seek Help In Accidents

Louis Bartholomew, the brilliant, little foreign minister of France, died to death, it is now known, from a bullet wound in his arm. The deepest shadow of that tragedy lies in the fact that his death from that wound could seemingly have been prevented. Hysteria and morbid curiosity on the part of the crowd delayed his arrival at a hospital; an extraordinary neglect of elementary first-aid such as a handkerchief tightly twisted about the wound, allowed his life to ebb away during the slow passage through tumultuous streets.

France bears the grief and burden caused by the costly stupidity of an excited crowd and the distracted attention of her minister. But every one of us should take to heart again the old and newly demonstrated lesson that in public disaster clearance should be made for the cool-headed and expert. Crowds that gather at scenes of accidents and fires are a serious hindrance to those able to give real help. The gaping spectator of casualties is both nuisance and menace.

If one cannot aid in time of catastrophe, one should at least keep out of the way of those who can.

Likely To Take Months

Establishment Of Canada's Central Bank Means Much Work

Establishment of the Bank of Canada is still a matter of time, and probabilities are that the organization will not begin to function until February next year. Subscriptions to the stock of the bank closed some time ago, and this was followed by a process of allocation. The policy of the government is to ensure that shares are held as widely as possible among all classes of the community.

This has increased the difficulty of those handling the situation and has also complicated the difficulty of the shareholders in the matter of electing directors to the bank. However, the shareholders' list will shortly be published in the official government periodical in order that shareholders may ascertain who among them are eligible to hold directorships. The statute provides for seven.

Wife: "A fine husband you are. Why, you can't even keep me in clothes."

Husband: "No. And I bought you a home, and I can't keep you in that either."

Traffic Cop—"Use your noodle, lady! Use your noodle!"

Lady—"My goodness! Where 'it I've pushed and pulled every thing in the car."

Catty: "My dear, I could give you a wrinkle or two!"

"I'm sure you could, darling, and never miss them, too."

FANCIFUL FABLES

SEE HERE, DARLING! I INSIST THAT YOU STOP USING MY NEW PLANE FOR A HAIR-DRYER!!

WHAT TO DO ABOUT "Acid Indigestion"

A WAY THAT RELIEVES THE CAUSE IN A FEW MINUTES

Many people who think they have "weak stomachs," or "indigestion," doctors say, suffer in reality from nothing more serious than acid stomach. And this common ailment can usually be relieved now, in minutes. All you do is take familiar Phillips' Milk of Magnesia after meals. This acts to almost immediately neutralize the stomach acidity that brings on your trouble. You feel like a new person!

Try this just once. Take either the familiar liquid "PHILLIPS", or the new Phillips' Milk of Magnesia Tablets. But watch out that you get the Genuine PHILLIPS' Milk of Magnesia. Made in Canada.

ALSO IN TABLET FORM. Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia

THE TENDERFOOT

By GEORGE B. RODNEY
Author of "The Coronado Trail,"
"The Canyon Trail," Etc.

SYNOPSIS

"You've fallen near to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been automatically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to go see what was happening for himself—not as Gerald Keene, half owner of the Hour-Glass Ranch, but as Duro Stone, tenderfoot in a Montgomery Ward wilderness outfit.

Dad Kane, dinner rat and luckless prospector till now, is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling Hour-glass cattle and protests against it.

Spike Goddard and Sam Dustin, fearing the old prospector may tell others the things he has seen as to the branding of Carr's cattle, plot to get him to show them the location of the mine and then to kill him. (Now Go On With The Story)

CHAPTER IV.—Continued

Dustin swung about to face a gray little figure that stiffened at sight of him. Sam Peters had been cashier of the Seco Bank for more than thirty years. Scotch by descent and cautious by nature, only once had he ventured to extend his activities beyond Seco. He was like Kipling's muskrat that all his life tried to muster courage to run to the middle of the floor. Peters mustered that courage once . . . and Dustin caught him with a loan of five thousand dollars on his house. That loan saved Peters his bank job but it made him the bond-slave of Sam Dustin.

"Just a moment, Peters. . . " Dustin drew him aside. . . "How much money does old man Carr owe the bank? I've got to know."

"The bank?" Peters quavered. "He don't owe the bank at all, Mr. Dustin. He did owe the bank but old man Pegram took it up. It's a note and Mr. Pegram's wonderin' right now what to do with it. He's lost a lot of money and needs cash. . . "

"How much is the note for?"

"Well. . . Old Carr hasn't paid any interest on it for a year. It's about twelve thousand dollars right now. And I'll tell you more. . . Old man Pegram better let go all holds on it just as soon as he can. Old Carr's in a bad way."

Dustin's heart gave a great jump. This was better than he dared hope. He stared hard at the little figure before him.

"I've got a five thousand dollar note of yours, Peters," he said. "It's secured by this house and lot, eh?"

"Yes, sir. That's so. . . " Something hard in his throat seemed to choke the little gray cashier.

"That note of yours is due next week. I want that note of Carr's that Pegram's got. See?"

"I. . . sir. . . I swear I don't see how I can fix it. It's Mr. Pegram's private business. I. . . "

More than ever did Sam Peters regret that accused slyer in what that was to remove him and his old wife from any danger of poverty. He made one final wriggle for escape.

"As matters stand, I don't see how it can help you to own a half share of the Hour-glass ranch," he said. "Half of it! You're a plain fool, Peters. I'll own the whole place; Soda Springs and all," he added. "Old man Carr owns the Hour-glass, don't he?"

"He owns half of it," said Peters. "That's all. When old man Peter Vinton died, he left the Hour-glass half to Joe Carr, his old partner, and half to his sister's son, one Gerald Keene. When Carr wanted to borrow money on his half of the place, we had to look up the will. That's how I know I saw the will. It says that if either

Carr or Keene dies, his half goes to the survivor. . . " "For the love of God! . . . " Dustin was breathless. . . "Say that again!"

"Peters said it again and Dustin, sure that he had not misunderstood, let go a smoke-scent of profanity. It was not the jovial profanity of good-nature but the vitriolic expletive of one who fears he has been hurt and who is not sure of the extent of the injury. In one brief kaleidoscopic moment the failure of his plans seemed sure. If Gerald Keene, the nephew of old Peter Vinton, owned half the Hour-glass then he, Sam Dustin, even if he succeeded in ousting Joe Carr, was only getting a new partner whom he did not even know.

He sized old Peters and whirled him about in the moonlight to face him. There was but one thing to be done. Too much depended on what old Kane knew! That miserable old desert-rat could send him and Spike to jail for a half a lifetime and Joe Carr could keep him out of a fortune. The solution came in a sudden storm of ill-considered impulse.

"If you want to keep a roof over your old wife's head," he snarled, "you buy up for me every scrap of paper that old Carr has signed. I want to own the half-share of the Hour-glass. Get me!"

Peters gaped helplessly at him. "I mean what I say, you old fool. Where can I find this man Gerald Keene? The man who owns the other half of the Hour-glass?"

"I don't know, Mr. Dustin. I swear I don't. Nobody knows. Even Mr. Carr don't know. He's been tryin' to find him through Mr. Burley of the Orville Bank in Cato but he wrote us that he was handling Mr. Keene's business and that Mr. Keene was travelling somewhere and couldn't be reached just now."

Dustin granted disbelief but he could do nothing at present. He had plenty of money in the bank and Peters knew it. There was no question of the validity of the check that Dustin wrote at the hotel desk and passed to the gray-faced little cashier who took it shakingly. He pounced it, refused a Nagar and headed for the bank feeling like a condemned criminal who has received notice of an unexpected reprieve.

"I'm sorry for old Carr," he muttered, "but I can't help it. I can't see Mame go to the Poorhouse and that's what'll happen if Dustin sees out that note. Oh, hell! What's the use kickin'. But I wish I could put a spoke in Dustin's wheel. . . "

He saw Pegram at the bank who was only too glad to get rid of Carr's note for Dustin's check and he turned that over to Dustin who promptly headed back for the Broken Spur. He found Spike anxious awaiting him and he was drawn into the office by a nod from his partner.

"What luck, Sam?"

"The best in the world except for one thing. I found out that old Carr does not own all the Hour-glass. He owns half of it. The other half belongs to one Gerald Keene, nephew of old Peter Vinton. If either Carr or Keene dies, the other gets the whole place. . . "

"Wait! said Spike who saw no further than the end of his nose. "You call it well, do you? Damned if I do. I can't get at this man Keene. No one seems to know his address. If I could find him, I'd offer to buy his share of the Hour-glass. One thing is sure now, though. We've simply got to find out from old Dad Kane the exact place where he located that ore."

"I hope you can shut his damned mouth," said Spike passionately. "Ed Raynor, the tax collector, was here for grub and old man Kane began shootin' off his face. He was stringin' in Gay and Corse about what he seen 'em doing up in the hills. I headed him off in time and I don't think Raynor caught on to what he was sayin'. . . What you goin' to do?"

He asked sharply for Dustin, with a sharp little oath, was heading for the bunk-house.

Old Dad Kane, standing just inside the door, was suddenly snatched off his feet and was sent spinning against the wall. He turned like a flash and a rusty old six-gun, a cap and ball affair, was thrust under Dustin's nose.

"Keep your yow hands where they're used to be! . . . In other men's pockets," snapped the old prospector. "What you want? Hey?"

"To shut your fool head and to keep you from lettin' all the world in on what you found. You damned old fool! Don't you know that one word from Ed Raynor'll send a hundred men up Red Water? Come into the house. I want to talk to you."

Wholly angry, sweating inchoate threats at every pore, Kane followed Dustin into the office. Once in the room Dustin turned on him:

"Look here, Dad. . . " His very tone was placating for he had time to reflect. . . "It's all my fault. I just wasn't standin' steady on my chance of a fortune go glimmerin' just because you talk too damned much. I don't know just what you said but I do know that after a long time in the hole most men's jaws relax. You mustn't give any one even a hint that you found pay-dirt in the hills. If you do, we're busted. You knew well enough that one word of gold in Red Water will start a stampede up there. Where'll we be then?"

North Pole Controversy

Claim Dr. Cook Came As Close To Pole As Admiral Peary

The claims of Dr. Frederick A. Cook to discovery of the North Pole were credited by J. Gordon Hayes, Polar historian, with as much accuracy as those of Admiral Robert E. Peary.

In his book, "The Conquest of the North Pole," published recently, Hayes said many of Cook's statements "may be accepted as genuine and truthful."

Rear Admiral Richard E. Byrd and Floyd Bennett were said by Hayes to have been the first persons actually to reach the Pole.

"Admiral Peary," Hayes said, "never was within 50 or more miles of the North Pole. There have been many critics of Peary's claim on both sides of the Atlantic, and all disinterested inquirers have come to the same conclusion—that he didn't reach the Pole; by this it may be understood he never was within 50 or more miles of its position.

Hayes submits Dr. Cook in 1908 "probably reached at least as high a latitude as that attained by Admiral Peary the following year; that Cook's statements except in relation to his attainment of the North Pole and possibly his glacial island, may be accepted as substantially genuine, truthful and accurate."

When automobiles travel at speeds in excess of 40 miles an hour more power is required to overcome air resistance than road resistance. More power is also required to overcome accident resistance.

Argentina is trying to keep down oil imports.

MINARD'S "KING OF PAIN" LINIMENT

Canadian western sheep ranges produce lambs from 150,000 to 200,000 lambs available for fattening purposes. In addition, there are at least 100,000 to 150,000 unfinished farm lambs that would benefit by being fattened.

An ancient well, 250 feet deep, was discovered in Palamieh several months ago, relieving drought in Palestine.

Dagenham, England, public library has abolished fines on overdue books.

Here's a tasty table delicacy for the Fall of the year—Apple Roll, made just at the season when firm, flavorful apples are at their finest. It's better too, when it's made with PURITY, the high quality all-purpose flour. In specialties, as in staple baking, such as bread, rolls, pies and cakes, you'll find PURITY products always uniform. Western Canada hard spring wheat from which it is milled is selected personally by PURITY FLOUR representatives. Its quality is maintained always at the same high level. Guesswork is eliminated, and when you use PURITY FLOUR you'll find that one brand, and that PURITY, is all you need for all your baking.

PURITY FLOUR
BEST FOR ALL YOUR BAKING

Weekly Newspaper Association

Successful Convention of Saskatchewan Section Held in Regina

A well attended convention of the Canadian Weekly Newspaper Association (Saskatchewan section) was held in Regina on October 28.

Mr. H. Gamble, publisher of the Advance, Gull Lake, was elected president for the ensuing year.

Mr. Gamble has been a member of the association for 17 years. Born in Cumberland, England, he served his apprenticeship in the printing trade in the Old Country and came to Canada in 1905. He has been connected with the Gull Lake Advance since 1915.

Mr. Gamble succeeds Donald C. Dunbar, veteran proprietor of the Estevan Mercury, whose 40 years of newspaper experience has won for him the title of "Dean of western journalism." Mr. Dunbar was elected honorary president.

S. N. Zing of the Wapella Post, another veteran of 37 years of Saskatchewan newspaper work, was elected vice-president, and J. Dorman, Alameda Dispatch, was re-elected secretary-manager of the association for the twelfth year in succession. Mr. Dorman was given a vote of thanks by association members for his services during his years as secretary-manager.

Appointed as this year's executive were S. N. Wynn, Yorkton Enterprise; C. W. Holmes, Rosestom Eagle; O. D. Stitt, Radville Star; H. Berryman, Blaine Lake Echo; J. O. Vopni, Davidson Leader.

Is but the glitter of the turning wheel. For there is no new thing and nothing strange. Does the long passage of the years reveal.

There is no change. The Grecian Helen's look. Was clear as yours when she was glad and young. Though now, between the pages of a book. Her story dives in a neglected tongue.

Life moves in cycles. Helen once was fair. As you to-day, for Paris' eyes to see. As you for mine, and on your cheek you wear. No brighter beauty's banner than did she. Though I could doubt your like has been before. Life wheels like stars, what has been comes once more!

Could Not Be Done
Uncle Tom: "So that's the baby?"
Father: "Yes."
Uncle: "I hope you'll bring him up to be a conscientious, upright young man."
Father: "I'm afraid that'll be difficult."
Uncle: "Pshaw! As the twig is bent so is the tree inclined."
Father: "Yes, but this twig is bent to be a girl, and we're inclined to let it go at that."

THE RHYMING OPTIMIST
By Aline Michaelis
LIFE MOVES IN CYCLES

Life moves in cycles and all seeming Is but the glitter of the turning wheel. For there is no new thing and nothing strange. Does the long passage of the years reveal.

There is no change. The Grecian Helen's look. Was clear as yours when she was glad and young. Though now, between the pages of a book. Her story dives in a neglected tongue.

Life moves in cycles. Helen once was fair. As you to-day, for Paris' eyes to see. As you for mine, and on your cheek you wear. No brighter beauty's banner than did she. Though I could doubt your like has been before. Life wheels like stars, what has been comes once more!

Some men deem the 30-minute sermon too long. So they substitute the 1152-column Sunday paper.

And once baking powder had a larger sale than face powder.

Little Helps For This Week

"He that loveth not his brother whom he hath seen, how can he love God whom he hath not seen?" 1 John 4:20.

Old friends, old scenes, will lover-lie be, As mote of heaven in each we see. Some softening gleam of love and prayer Shall dawn on every cross and care. —J. Keble.

It requires far more of the constraining love of Christ to love our cousins and neighbors of the heavenly family, than to feel warm to our suffering brothers in Tuscan or Madeira. To love the whole Church is one thing; to love, that is to delight in the graces and veil the defects, of the person who misunderstands us and opposed our plans yesterday, whose peculiar infirmities grate on our most sensitive feelings, or whose natural faults are precisely those from which our natural character most revolts, is quite another.

A Temple there has been upon earth, a spiritual Temple made up of living souls, a Temple with God for its light and Christ for its high priest, with wings of angels for its arches, with saints and teachers for its pillars, and with worshippers for its pavement. Wherever there is Faith and Love this Temple is.—J. H. Newman.

Just after being accented for a nickname to buy a cup of coffee one reads that the Brazilian coffee crop this year will amount to 29,880,000 bags, of which 11,952,000 bags will be destroyed to keep down the supply. Isn't it a queer world? Or is it the people?

Some men deem the 30-minute sermon too long. So they substitute the 1152-column Sunday paper.

And once baking powder had a larger sale than face powder.

Great RADIO INVENTION for UNWIRED HOMES!

● A marvelous new source of radio power—brings a new type of radio—with the quality of the finest electric set you have ever heard—and electric set convenience!

AIR-CELL RADIOS

● Are built to operate with the new EVEREADY Air-Cell "A" Battery, an amazing electrical unit that re-energizes itself for at least 1000 hours—which, at 3 hours a day is almost a year's service in the average household.

NO MORE RECHARGING

● You have no more battery recharging. Every program comes through clear as a bell for the entire life of the Air-Cell Battery. But don't confuse the new Air-Cell Radio with ordinary battery-powered sets. They are as unlike the old sets as anything can possibly be. They are new in perfect reception—new in easy operation—new in low upkeep cost.

Air-Cell Radios are now being built by all radio manufacturers—designed specially for the EVEREADY Air-Cell "A" Batteries. Ask any dealer a demonstration—your interest will be well repaid.

Crossfield with a population of 325 can boast of three churches and an Oxford Group. Not bad.

Capacity House Greets Talented Local Players

C. D. S. Should Prove Valuable Asset To The Community

Playing to a bumper house, the Crossfield Dramatic Society on Tuesday evening October 30th presented their initial production, that of three one-act plays. The plays for this occasion comprised "tragedy," "light comedy," and "drama" and the selection made a delightful blending.

"A Serpent's Tooth"
The opening play of the evening, and as the curtain slowly opened the audience were treated to a pleasing stage setting of Oriental nature. Idols, tapestry, brass utensils, cushions, everything in perfect keeping to the tune of the play, and there before his Gods knelt Chundra Bagh the leading character. The play showed the working of the Oriental mind, and now different it was life from the standpoint of the Occidental. Having found his caste defiled Chundra Bagh sets things right according to his race, and causes his daughter to die from the bite of one of his snakes. On the arrival of her English sweetheart, Officer Sheldon finds in his dismay, only the dead body of his Indian sweetheart, and overcome by remorse by what he has caused slinks away, leaving the father to mourn for his dead before his Gods.

In the title roles of Chundra and his daughter Koonarti, Alfred Stevens and Edith Seville were cast, and both gave masterful portrayals. Ably supporting them Les Spivey, J. McClelland and G. Goldie in the lesser roles of the other Hindoos, played up very effectively, and their parts found nice balance in the part of the Sheldon Sahib played by G. Y. McLean. Mrs. Goldie the director is to be complimented for the time she expended on this production, and also for the careful and correct setting of the play.

"The Neighbours"
A delightful little play, with characters drawn bodily from small town life, giving quite a touching slant on the efforts to be expended by the neighbours for an orphan boy. Characters that might be found right in our midst, and ably presented by the cast chosen for this play. Jean Stevens, as Mrs. Abel, and Mabel Young as Mrs. Trot, were very good throughout, and Glen Williams as Peter the beautiful lover kept the good folk out in front in laughter at his antics, and historical love making. Alice Collicott as Glen's sweetheart contributed a nice effort to her partner, as so did Stella Gordon as Mrs. McLean, who poor body would like to do things if it were not for her aching back. The other characters in the play acquitted themselves very well, and Ezra Williams, Grandma, and Carrie Ellsworth played by A. Currie, E. Devins, and A. McClelland respectively, deserve congratulations. Neighbours made a delightful deviation from the other plays.

"The Valiant"
John Dyke is waiting in a State Prison to die. Nothing is known of who or what he is, except that he has killed a man. The Warden and Chaplain question him, but he will not reveal his name or story. On the day of his execution a young girl comes to see him, thinking he may be her long lost brother. Dyke recognizes her, but the girl is not so sure about him, and he sends her back to their mother happy in the belief that her brother died as a hero in France. Then with head up, he walks through the door of the execution chamber.

In the title James Dickson gave a highly polished and well finished production, receiving unstinted plaudits of his audience. Florence Cruickshanks as the Girl, stepped into the limelight, and gave her listeners, careful, and sympathetic representation, and she along with The Valiant awakened many an emotion in the hearts of the audience. Both were accorded hearty rounds of applause on their final exits.

In a role made to order Fred Baker was cast as Ward Holt, and over a past favorite with local players proved no exception on this occasion. Herbert Seville as Father Daley, was a happy choice, and throughout he was the sympathetic Minister and Chaplain, administering to needy despairing souls. In the minor roles of the prison attendants Austin Whillans and Les Spivey were excellent and lent their aid to a highly enacted production.

The last two plays were under the direction of G. Y. McLean and he comes in for a big share of the credit for the successful evening so thoroughly enjoyed by all who attended.

A Decided Community Asset

It would appear that the Crossfield Dramatic Society should prove a distinct benefit to the community, its purpose being to present at various times plays for the benefit of churches and charitable organizations.

The initial production was for the purpose of raising funds to buy necessary equipment. When future plays are produced the sponsoring bodies will receive full benefit from box receipts, after paying expenses, and a small commission to the C. D. S.

Look over our line of personal Christmas Greeting Cards—Chronicle office.

Board of Trade Notes

Do the majority of the merchants realize that their absence from the monthly meetings is very much noticed by those who attend from outside points.

The monthly meetings are as much benefit to the business men as the farmers of the district.

"Community Co operation" is the slogan of the Board of Trade.

It may be of interest to know that the Board has a membership of 135.

The Board of Trade is the biggest asset Crossfield and District has ever had.

A Livestock Feeders Association has just been formed through the connection of the Board of Trade.

Dramatic Society Rehearsing

During November and December the Society will produce the Comedy Drama "Putting It Over" for the Anglican Church, and that rib tickling Farce Comedy "The Mummy and the Mumps" on behalf of the Catholic Women's League. Don't miss them, it will repay you and help all concerned.

Village Council Meeting

The regular monthly meeting of the Village Council was held in the Fire Hall on Monday evening. In the absence of the Mayor, Councillor C. Amussen occupied the chair.

A petition was received from the residents of Strathcona Street, asking that another street light be erected between Limit Avenue and Osler Street. This petition will receive the consideration of the Council.

An application was also received from M. Patmore to obtain permission to build a sheet iron warehouse with cement foundation 11x24 on Lot 4, Block 14.

Several citizens approached the Council, stating they were willing to volunteer their services in the taking down of the fence at the old skating rink and move it to the new rink and they would also assist in setting up the fence.

The Council accepted their kind offer and thanked the delegation for coming to their assistance so timely as they had under serious consideration of not going to further expense in connection with the rink until another year.

The routine business of the Village then followed and brought the meeting to a close.

Auction Sale

Monthly Meeting Board of Trade

The monthly meeting of the Board of Trade held in the Masonic Hall on Thursday last was largely attended by the farmers and livestock men of the district, as arrangements had been made to have two special speakers for the evening. E. Brunsden, of Calgary who gave an interesting address on the New Marketing Act and J. Wilson of Innisfail, a well known authority on the Feeding of Livestock.

Mr. Wilson proved so convincing in his address, that immediately after the close of the meeting, a number of those present formed themselves into a meeting and decided then and there that a Livestock Feeders Association be formed in the Crossfield District.

Livestock Feeders Association

Another organization has come into existence in the community, under the name of the Crossfield and District Feeders Association. This movement is welcomed and should be of benefit to the district in general.

We understand that the following officers have been elected: President, J. R. Lait; Vice-President, J. Havens; Secretary, T. Tredaway. A meeting of the Association will be held in the Fire Hall Saturday afternoon November 10th at 2:30. It is the wish of the President that everybody interested attend.

A Visit to the Wright Farm

The editor paid a visit recently to the farm of H. P. Wright and found him very busy making preparations to clean seed grain. A new double drum Carter Disc was being installed in connection with a large fanning mill. Both are driven from a line shaft. Elevators and augers save the grain time with very little handwork.

It looked a very efficient and up-to-date cleaning plant and should do a good job.

Mr. Wright had a large acreage of certified 222 Bobs wheat which averaged 34.1-2 bushels per acre. The highest yield being 43.3-4 bus.

A carload of 1500 bus. has been ordered by the Searle Grain Co. at Winnipeg for distribution under their crop improvement scheme.

This carload will be cleaned and sacked for immediate shipment. Some of this seed will no doubt be used in our district to replace Garnet.

Enumerators Complete

Registration of Voters

The work of the enumerators on their preliminary lists of electors was completed on October 23. Each enumerator will sit in his home as designated in notices, on Nov. 13 and 14 and 15, from 1 p.m. to 5 p.m. for the purpose of adding such names to the list as may have been inadvertently omitted, or those who may have become eligible in the meantime. Lists are posted in the post office and home of the enumerator, and may be seen at any time by those interested.

To Be Relied On

In long experience with United Grain Growers Limited in selling their grain and in buying farm supplies, not only shareholders but all farmer customers have learned that this is an organization that is to be relied on.

Both the Company's facilities and its purpose to give the best possible service to farmers are unsurpassed.
